**WYNNSTAY  
FEEDS**

2011-12

Beef production is now a highly specialised business requiring feeds that perform.

In order to meet specific end market requirements, Wynnstay's range of feeds & services are designed to help support you:

- **PrimeBeef™** range of diets now including BIOSPRINT Live Yeast
- **Diet Check Beef** - computer rationing program
- Forage analysis (incl. mineral assays)
- Customised mineral package
- Links with major meat processors
- University & on-farm trials - research driven feeds

**PrimeBeef™ Elite**

**PrimeBeef™ Supreme + BIOSPRINT Live Yeast**

**PrimeBeef™ Premium + BIOSPRINT Live Yeast**

**PrimeBeef™ + Urea Concentrate**

The **PrimeBeef™** range of diets includes diets suitable for growing right through to finishing. There's a diet to suit all systems whether that be intensive bull beef; silage beef, grass finishing; stores; suckler cows/calves.

## Ingredients used in PrimeBeef™ range:

Wheat	Non-GM Hipro Soya	Sodium Bicarbonate
Barley	Wheatfeed	Molasses
Maize Meal	Rape	Specialist Mineral Supplement
Toasted Soya Hulls	Sunflower	Vitamin E Premix
Sugar Beet Pulp	Palm Kernel	BIOSPRINT Live Yeast
Citrus	Ammonium Chloride	

## Results from trials conducted at Harper Adams University College

**Stock:** Jan-Feb born Holstein bulls @ 195kg

**Ration:** PrimeBeef nuts fed *ad lib* with straw offered from racks.

**Conclusions:** According to Simon Marsh, Senior Ruminant Lecturer at HAUC, "the performance of these animals exceeds the expected targets for an intensive cereal bull beef system."

### Results: Animal Performance (kg/head)

Slaughter wt	547.3
Days	228.5
DLWG	1.55
Carcass wt	283.5
Carcass DG	0.85
KO %	51.8
Carcass classification	-0/O+3
Total feed intake	2215

Holstein Bull Beef
